

WHAT IS CBAR?

Softwatch Chromebook Adoption Readiness (CBAR) Assessment Solution detects **Cloud Workers** and provides multi-layered actionable data to enable the optimal adoption of Chrome Devices and **accelerate remote working readiness**.

HOW DOES IT WORK?

CBAR provides you with just the right type of business intelligence - **Deep Apps Usage Analytics**. This is an innovative and most convenient approach to get unparalleled data on how your employees work, make the transition to the cloud as smooth as possible and **accelerate remote working readiness**.

CBAR **segments users** into those that are ready to adopt Chrome Devices, and those that require some additional attention before moving.

Cloud Workers those who are ready to adopt Chrome OS

Potential Cloud Workers those who could potentially be cloud workers

Desktop Workers those who are dependent on non-web apps to perform their job

HOW CAN CBAR HELP YOU?

By utilizing **Softwatch Deep App Usage Analytics**, you will be able to:

- **Lower TCO and Operational Costs** by providing Chrome devices to cloud workers
- Acquire exclusive optimization data to **eliminate costs related to non-usage**
- Uncover unparalleled insights to enable further **IT cost saving initiatives**
- Accelerate **remote work readiness** ensuring business continuity

CBAR displays the exact level of dependency on non-web applications, enabling decision makers to design a practical plan for the adoption of Chrome devices.
